

# THINK THIS OVER THEN **YOU** DECIDE JOBS AND ECONOMY

## **LOST JOBS -- A FIRST FOR ANY PRESIDENT IN 60 YEARS**

We've lost nearly a million jobs, making Bush's administration the only one since the 1930s to lose rather than gain jobs. President Bush promised his 2003 tax cuts would create jobs, but **they have produced 2.7 million fewer jobs than his administration had predicted** – not enough to keep up with new people entering the work force each month.

## **FULL-TIMERS SETTLE FOR PART-TIME WORK**

On President Bush's watch, **the number of Americans who say they are working part-time because they can't find full-time jobs has increased 35%**. This is the largest increase for any president on record.

## **MANUFACTURING WORKERS ARE HIT HARDEST**

**Between 2001 and 2003, almost 1 in 10 manufacturing workers were laid-off from a job they had held for at least 3 years.** By the beginning of 2004, 33% of displaced manufacturing workers had still not returned to work; and when they did, 73% of them had to take a pay cut.

## **DENYING OVERTIME TO MORE WORKERS**

**President Bush tried to pass new overtime regulations denying overtime pay to about 6 million workers** by allowing employers to redefine more workers as "administrators" and "executives."

## **TAX CUTS FAIL TO SPUR ECONOMY**

**Bush's tax cuts have contributed more to our record-breaking federal deficits than all other new government spending combined, including Iraq and terrorism-related costs.**

## **RECOVERY HELPS CORPORATE PROFITS FIRST**

Of the economic gains in the last 3 years, only 15% has gone to wages and salaries, the smallest share in 50 years. **47% has gone to corporate profits, more than in any period since World War II.**

## **RECORD TRADE DEFICIT MAKES US DEPENDENT**

**Under President Bush the U.S. has experienced the largest trade deficit in history**, making us dependent on foreign countries, especially China and Japan. They loan the United States 87% of the dollars needed to cover the gap between what we import and export.
