

THINK THIS OVER THEN **YOU** DECIDE

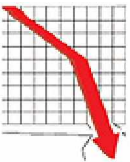

SNAPSHOT OF OUR LAST FOUR YEARS

RESULTS OF WAR

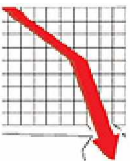

We've spent \$151 billion on the war in Iraq -- 3 times the original estimate. Yet we've found no weapons of mass destruction and no link between Saddam Hussein and Al Qaeda terrorists. The war has killed over 1,000 Americans and 16,000 -- mostly civilian -- Iraqis. It diverted us from capturing the 9/11 mastermind Osama Bin Laden and has actually "accelerated recruitment" of his terrorist network. The war was declared illegal by the head of the U.N. and has turned many allies against us.

JOBS AND THE ECONOMY

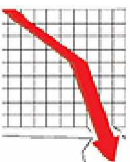

We've lost 1 million jobs since President Bush took office, -- the *only* administration to see a net loss since the 1930's Depression. Home foreclosures jumped 50%, and 4 million more Americans sank into poverty -- now 36 million. But this administration has reduced the occupations eligible for overtime pay and proposed allowing states to opt out of the Federal minimum wage of \$5.15.

HEALTH CARE ACCESS

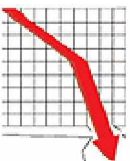

49 people die each day because they lack health insurance, yet 6.3 million fewer people are insured than when Bush took office -- now 45 million. Drug prices have risen nearly 3 times faster than inflation. But this administration passed a law barring Medicare from negotiating lower prices from drug corporations.

ENVIRONMENTAL QUALITY

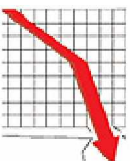

More than 1 in 3 Americans is breathing polluted air, leading to as many as 200 deaths a day. **Yet the Bush administration's Clear Skies Act would repeal key parts of the Clean Air Act and allow *more* pollution from coal-fired plants.**

HOMELAND SECURITY

20,000 shipping containers a day arrive in the U.S., but only 5% get inspected. President Bush refused to fund the Container Security Act and resisted a law that would have secured 15,000 hazardous chemical plants vulnerable to terrorists. **The Bush administration has also proposed cutting funds for firefighters and first responders, and cutting funding for police in half.**

FINANCIAL STABILITY

President Bush turned a \$236 billion annual surplus into a \$520 billion deficit -- creating the largest national debt in history -- mainly by cutting taxes for the wealthy. **Paying interest on this debt costs us more than the combined budgets of homeland security, education, transportation, justice and environment.**
